**Adjusted EBITDA Explanation:**

Earnings before interest, income taxes, depreciation and amortization, or EBITDA, is a commonly used measure of performance in the casino and hospitality industry. EBITDA is not a measure of performance calculated in accordance with GAAP. The Authority historically has evaluated its operating performance with the non-GAAP measure, Adjusted EBITDA, which as used in this press release, represents earnings before interest, depreciation and amortization, reassessment and accretion of discount to a relinquishment liability, pre-opening costs and expenses, loss on disposition of assets, workforce reduction severance, loss on early exchange of debt and write-off of debt issuance costs, other non-operating income and expense and loss attributable to non-controlling interests.

Adjusted EBITDA provides an additional way to evaluate the Authority's operations and, when viewed with both the Authority's GAAP results and the reconciliations provided, the Authority believes that it provides a more complete understanding of its business than could be otherwise obtained absent this disclosure. Adjusted EBITDA is presented solely as a supplemental disclosure because: (1) the Authority believes it enhances an overall understanding of the Authority's past and current financial performance; (2) the Authority believes it is a useful tool for investors to assess the operating performance of the business in comparison to other operators within the casino and hospitality industry since Adjusted EBITDA excludes certain items that may not be indicative of the Authority's operating results; (3) measures that are comparable to Adjusted EBITDA are often used as an important basis for the valuation of casino and hospitality companies; and (4) the Authority uses Adjusted EBITDA internally to evaluate the performance of its operating personnel and management and as a benchmark to evaluate its operating performance in comparison to its competitors.

The use of Adjusted EBITDA has certain limitations. Adjusted EBITDA should be considered in addition to, not as a substitute for or superior to, any GAAP financial measure including net income (as an indicator of the Authority's performance) or cash flows provided by operating activities (as an indicator of the

Authority's liquidity), nor should it be considered as an indicator of the Authority's overall financial performance. The Authority's calculation of Adjusted EBITDA is likely to be different from the calculation of Adjusted EBITDA or other similarly titled measurements used by other casino and hospitality companies, and therefore, comparability may be limited. Adjusted EBITDA eliminates certain items from net income, such as interest, depreciation and amortization and reassessment and accretion of discount to the relinquishment liability. Each of these items has been incurred in the past, will continue to be incurred in the future and should be considered in the overall evaluation of the Authority's results. The Authority compensates for these limitations by providing the relevant disclosure of interest, depreciation and amortization, reassessment and accretion of discount to the relinquishment liability and other items excluded in the calculation of Adjusted EBITDA, both in its reconciliations to the GAAP financial measure of net income and in its consolidated financial statements, all of which should be considered when evaluating its results. The Authority strongly encourages investors to review its financial information in its entirety and not to rely on a single financial measure.
